

Participation in the CYPHER 3rd General Meeting in Istanbul was an excellent opportunity to present my research progress and engage with researchers involved in the CYPHER project. During the meeting, I presented my work in the form of a poster. The poster summarized my current research, including the background, methodology, main results, and future research directions. This provided a valuable opportunity to communicate my work to project partners and receive feedback from researchers with related expertise.

During the poster session, I had meaningful discussions with other participants about my research topic and its connection to the broader objectives of the CYPHER project. The attendees showed interest in the methods I used, the interpretation of the results, and the possible next steps of the work. I received useful comments and suggestions, which helped me reflect on my current approach and consider potential improvements for the next stage of my research.

In addition to the poster presentation, I attended scientific presentations, project updates, and group discussions. These sessions allowed me to gain a better understanding of the overall progress of the CYPHER project and the contributions of different research groups. They also helped me place my own work within the wider project framework and identify possible connections with the work of other partners.

The meeting also provided an important opportunity for academic networking. I was able to exchange ideas with researchers from different institutions, discuss ongoing research challenges, and establish contacts that may support future collaboration. Presenting my work in an international research environment also helped improve my academic communication skills and confidence.

Overall, attending the CYPHER 3rd General Meeting was highly valuable for both my research development and professional growth. The feedback I received, the knowledge gained from the scientific discussions, and the connections established during the meeting will be beneficial for my future research. I am grateful for the support from ELTE, which made it possible for me to participate in this meeting in Istanbul.
