

## ***ELTE EPIDEMIOLOGICAL OPERATIVE COORDINATING BODY***

### **STATEMENT**

on distance organisation of admission procedure and examinations

In accordance with the information received from the maintainer on the 101/2020. (IV. 10.) Government Decree on measurements concerning higher education institutions and students during the emergency situation, we order as follows:

1. The ELTE Epidemiological Operative Coordinating Body confirms that during the general admission procedure in 2020

a) the entrance examinations (professional orientation tests, language skill tests for foreigners, practical and oral aptitude tests, higher education professional exams and master programme entrance examinations) can be organised only in the form of distance examination;

b) the aptitude test for combined teacher training programmes will be replaced by the evaluation of the applicant's motivation letter;

c) the aptitude test for primary school teaching, kindergarten education, and the infant and early childhood education programmes will be replaced by a written declaration from the applicant that they do not have any disease that would hinder their higher educational studies; furthermore, that they do not suffer in dyslexia, dysgraphia, dyscalculia, psychical and mental disorders, and referring to these they will not seek an exemption during their studies.

2. The ELTE Epidemiological Operative Coordinating Body confirms that examinations of educational progress (including especially the thesis defence, final exams, complex exams, doctoral comprehensive exams, workshop debates, doctoral thesis defence) that require personal attendance of students are not allowed to be held in the remaining period of the 2019/2020 academic year.

3. The ELTE Epidemiological Operative Coordinating Body complements the regulations of training and examination for distance education as listed in the Annex. It also informs that it will review the measurements on examinations on the basis of the remarks made by the faculties and members of the Senate, but the current measurements are valid until contrary provisions are made.

Budapest, 22 April 2020.

The ELTE Epidemiological Operative Coordinating Body
