the week prior to the first day of the Autumn semester is the registration period, and in the
Spring semester, the week before the semester’s first day. This period is exclusively dedicated
to academic obligations pertaining to registering for courses and negotiating a workable
timetable. For this reason lecturers must keep consultation hours at least twice to discuss such
matters.

– first (Autumn) semester of the …/… academic year;
– second (Spring) semester of the …/… academic year.

(3) \textsuperscript{155} A semester is a 21-week term of study which divides into a 14-week study period and a

Study units completed by college members with college for advanced studies courses do not factor into the 10% credit overflow, set out under Section 49 (2) ANHE, that students can take free of charge. The same rule applies to students with honoraria status.

(6) Courses that satisfy compulsory study units must be published for the semester the programme’s curriculum scheduled it for, by the organisational unit responsible.

(7) Exam courses for foundation exams, language proficiency exams, comprehensive exams, language proficiency final exams must be published every semester.

(8) 162 Courses for retake exams specified under Section 16 (3) point b) of present Regulations are published by the Head of the organisational unit responsible for the course, at the initiative of the student and the course lecturer.

(9) The organisational unit offering a course may set minimum and maximum capacity numbers for the course. The capacity number must be included in the course description.

(10) To assure the completion of compulsory study units, at least so many courses must be published that their aggregate number of participation yields 115% that of the curricular headcount. Regarding courses published to ensure the completion of compulsory study units scheduled in the curriculum for the first semester, the upper limit for capacity numbers must be at least 115% of the student intake number and the number of students preregistered combined together.

(11) Curricular headcount denotes the student intake number for the year in which students can complete the study unit, provided they progress in their studies according to the curriculum.

**Vhr2. Section 10 (1)** Upon commencement of the study period, the higher education institution shall be required to publish in the Academic Guide, in the manner customary, the methods of student performance assessment and the related dates of such assessment during the given term (…)

Section 56

(1) The Head of the organisational unit responsible for publishing courses records them (including exam courses) on Neptun until the end of the 8th week of the previous semester. The courses’ description must be attached (see under Section 17 (2) of the present Regulations), and whether students in another programme can register for them without fulfilling the course prerequisites.

(2) The preliminary course listing must indicate the lecturer, the time and the location of the course (except for special courses and exam courses), and the preliminary minimum and maximum capacity number for participation. If the person of the lecturer is not settled, the name of the course organiser must be displayed.

(3) Regarding compulsory study units, courses satisfying them must be specified with capacity numbers in accordance with the number of students who have preregistered for them. If this is not possible at the time, then in the next semester, or at the very latest, within a year, opportunity must be given to those students who could not register to complete the course.

(4) Course organisers check on Neptun whether the courses do in fact satisfy the study units they are published for, and whether enough courses were published with adequate capacity numbers. Should corrections be made, the organisers are responsible for implementing them.

(5) The Vice Dean responsible for educational affairs, taking into account the course organisers’ modifications, makes sure that the preliminary course listing is published by beginning of the fourth week of the previous semester’s examination period on Neptun.

(6) The Head of the organisational unit responsible for the course can request the person responsible for scheduling at a department to modify, supplement and subtract from the preliminary course listing. The department course scheduler cooperating with the course organiser (especially in terms of reducing capacity numbers and changing the study unit), can modify the course listing, but cannot delete exam courses.

(7) All courses satisfying the same study unit can only be deleted, if the total number of students registering to these does not reach the minimum capacity number for any. Following the course organiser’s decision, the Office of Educational Affairs deletes the course and informs the students concerned.

(8) The Vice Dean responsible for educational affairs shall be responsible for publishing the final course listing by the first day of the semester. If the time and location of a course has not previously been made public, then the course listing must contain a time and place for the students and the lecturer to negotiate a schedule, which can only take place during the registration period.

(9) Courses that have not been published in the course listing cannot be offered. In exceptional cases (publishing exam courses, modifying capacity numbers for already published courses, courses taught by visiting lecturers who have arrived unexpectedly) with the Dean’s permission, courses can be published correctly, at the latest by the end of the course registration period. With a good reason, the Dean can give permission to publish condensed courses by the end of the sixth week of the study period. In this case the organisational unit offering the course makes sure to duly inform the students in an announcement or in the manner that is customary at the faculty.

(10) Organisational units can cancel courses already published by Thursday of the second week of the semester.

166 Established by Senate Rule CXX/2015. (29 June) Effective date: 15 August 2015.
The Dean of the faculty can decide to publish only the final course listing. In which case courses can’t be preregistered for.

**PREREGRISTERING FOR COURSES**

**Section 57**

1. If the faculty publishes a preliminary course listing, students can register for them before the course registration period.
2. The course preregistration period starts when the preliminary course listing is published and ends two days before the course registration period starts. During this period students can preregister for the courses for the next semester on Neptun, in accordance with the regular rules of course registration.
3. During the preregistration period students can register for courses in the value of 45 credits in total.
4. Preregistration is not compulsory, students can register for courses during final course registration they have not preregistered for.
5. In the first semester of the year of enrolment there is no preregistration period for freshmen for their programme (including higher education vocational training) or track. If at the department freshmen are organised into study groups, the rules of course registration for designated courses can be found under the Special Provisions.
6. The list of teams for the study groups is assembled by the Office of Educational Affairs by the last working day before the registration period, at the latest, and recorded on Neptun.
7. The process of building teams cannot interfere with the student’s rights to register for courses.
8. Courses for teams must have a maximum capacity number that is 15% higher than the team headcount.
9. Students who have not registered cannot preregister for courses.
10. Based on preregistration, the Head of the organisational unit responsible for the course can decide to cancel it, and, if needed, to offer other courses.

**Course registration**

ANHE Section 43 (1) The student shall have the right to receive full, accurate and accessible information for commencing and continuing their studies, defining their study schedule and using educational opportunities and capacities available in the higher education institution...

Section 49 (2) Students shall be granted the opportunity to enrol for optional course units specified in the operation and organisational manual of the institution up to five percent of the credits required for the award of the diploma (or have the alternative option of engaging in volunteer work), and shall be offered a range of credit-earning course-units to select from at least twenty percent in excess of the total number of credits required. It is necessary to ensure that the student has the option of taking 10% more credits in relation to the total number of prescribed credits without having to pay extra tuition fee for these.

**Section 58**

1. Students – with the limitation set out under (1a) – are entitled to register for any course and exam course offered by organisational unit of the University on Neptun (course registration).
2. If the student is enrolled on multiple programmes, he/she cannot register for courses that form part of his/her other programme’s ideal curriculum.
(2) Students pay a fee for registering for courses (including retaking failed courses) above the allocated limit of total credits detailed under Section 49 (2) of ANHE, according to regulations set out in Chapter VII of the present Regulations.

Section 59

(1) Students can’t retake a course with derived content that belongs to a study unit they have already completed. A course with free content, belonging to an already completed study unit can only be retaken out of non-programme (including higher education vocational training) credit allowance. Courses cannot be retaken to improve grades. 
(3) In the course registration period computer labs need to keep open 11 hours a day on an even weekly basis.

Section 60

(1) Should students who have registered for courses in Neptun undergo ranking for available places, points will be rewarded based on the following criteria:
a) 180 181 students beginning their studies in a programme (including higher education vocational training), and students who preregistered for the course must be rewarded, provided that preliminary course registration was required at the Faculty: 100

b) students must be rewarded the most points from the following options that applies to them:
   – for students for whom the study unit that the course satisfies is compulsory: 80
   – for students for whom the study unit that the course satisfies is a compulsory elective: 70
   – for students for whom the study unit that the course satisfies is not compulsory, but in one of their major’s tracks it is compulsory or a compulsory elective: 60

c) for students who register for the course in accordance with the ideal curriculum: 10

d) 182 for part-time and distant education students (including higher education vocational training) studying multiple programmes at the same time regardless of which of their active programmes the course belongs to: 20

e) 183 every student must be rewarded points ten times the number of programmes they are studying (including higher education vocational training) at the university (for the purpose of this paragraph, fixed programme pairs, the programme pairs of single-cycle long teacher training programmes and the modules of graduate teacher training programmes count as separate programmes).

f) 184 students must be rewarded points five times the semester they are in: maximum 60

g) 185 students who have exceeded the time of the education period registering for a course in the programme’s ideal study unit: 65

h) 186 students who have exceeded the time of the education period registering for a course not part of the programme’s ideal study unit: 60

i) 187 students with active honoraria status registering for programme courses detailed under Section 27/A of this Regulations:

j) 188 students who fill out all OMHV surveys within the allotted time frame

k) 189 special needs students with active registration status 1000

1a) 190 special needs students with active registration status can be rewarded the points under paragraph (1) point k), if previously required during their registration with the special needs coordinator.
(2) 191 If multiple students with the same points get into the course, and this way the number of students in the course exceeds the capacity number, Neptun will “randomly” assign the students partaking a number on the basis of the following criteria:

a) 192 the rank number can only depend on the student’s code generated by Neptun, on the term of study and the course’s unique identification number,

b) if a student drops a course but later re-registers for it, he/she will be awarded the same amount of points,

c) all students should have the same mathematical chance in the ranking process.

(3) If it is possible, the course publisher can increase the capacity number in the course registration period.

(4) 193 If the course publisher specifies academic requirements for taking the course, cooperating with the Office of Academic Affairs they must let the students know whether they got in until the 3rd day of the semester. The number of students taking the course cannot exceed the capacity number.

(5) A student, having preregistered for the course published for his/her study group, will be able to take it regardless of ranking.

Section 61

(1) 194 During the course registration period, until the first day in the second week of the study period, some course registrations can be cancelled on Neptun based on the following:

a) 195 course registration must be cancelled if the student has not completed the course’s strong requirements, and has not registered for courses satisfying the weak prerequisites, except if this course is not part of any of the student’s programme’s (including retaking failed courses) curriculum;

b) in case co-registration is required (for co-requisite courses), the course registration must be cancelled if the student has not registered for the other course, except if it has been completed in a previous semester;

c) so many registrations should be cancelled from the end of the ranking list that the number of students does not exceed the capacity number for the course.

(2) 196 The Directory of Educational Affairs will inform the students about the cancellations through Neptun or by email without delay.

(3) Vacancies resulting from cancellations can be applied to from the time specified under paragraph (1), until the end of the study period’s second week. During this period course registrations are approved in the order of registration, independent of ranking (speed course registration).

(3a) 197 Unnecessary course registration occurs if the number of courses a student has registered for within the last 72-hour period of the speed course registration phase exceeds by more than five courses the final number of courses registered for at the end of the registration period. Unnecessary course registrations are subject to a fee in the cases of courses where the number of places available have been filled. The fee payable is calculated for the courses registered for that exceed the limit of five courses.
(4) If the course registration was cancelled on Neptun because the completion a study unit, listed as a prerequisite for the cancelled course, was not recorded in time, the student must be given the opportunity to take a course which satisfies the same study unit.

(5) If a student withdraws his/her registration for studies, courses registered for that semester must be deleted.

(6) On a student’s occasional request, course registration must cancelled at the decision of faculty’s Educational Committee, if it can be proven that the student wasn’t able to participate in the course due to failings on the University’s or the lecturer’s part.

Section 62

(1) If fewer students register for a course than the minimum capacity number of the course, the course organisers may decide not to offer it.

(2) The Head of the organisational unit responsible for the course informs the Head of the Office for Educational Affairs and the students via Neptun about the cancellation of the course.

Section 62/A

Upon request by the student, the Faculty Educational Committee may grant the student permission to register for courses for which attendance is compulsory within one week after the expiration of the course registration period.

Class

ANHE Section 108 (37) class: means a class requiring the personal cooperation of the lecturer for the fulfilment of the academic requirements specified in the curriculum (lecture, seminar, practice, consultation), with a duration of no less than 45 minutes and no more than 60 minutes.

Section 63

(1) Attendance can only be made compulsory if it is specified by the curriculum. If attendance is compulsory, it is the lecturer’s responsibility monitor it (attendance sheet) and hold on to it until the end of the following a semester.

(2) Attendance, participation and fulfilling practical requirements are compulsory in the case of practices and seminars. The lecturer monitors and keeps a record of attendance.

(3) Practice and seminar fulfilment requirements could be:
   a) report on tasks performed during practice or seminar and/or,
   b) assignment done outside practice and/or,
   c) in-class test and/or,

(4) Practical requirements are specified in the training programme’s curriculum. In the first class, students must be informed about the fulfilment of these requirements, academic assessment, course topics and outlines, compulsory or recommended literature, opportunities to catch up with late and missed assignments. Attendance alone is not enough to complete the course and gain credits.

(5) Students can be excused from compulsory attendance of essential courses specified in curriculum – if the training programme’s curriculum permits it – by the lecturer if the student can prove their knowledge of the course’s material, in way the lecturer determined. The

student is not excused from completing the rest of the requirements, and the course’s completion must be recorded in the regular way. An excuse must be given in a written form.
(6) Audio or video footage in class can only be recorded with the prior permission of the lecturer and – in case of seminars and practices – the other students. Students with special needs can record footage without prior permission, according to their needs.
(7) Classes are 45 minutes long, unless the training programme’s curriculum states otherwise.
(8) Requirements and procedures are set by the Teacher Training and Continuing Professional Development Committee, the Teacher training Centre is responsible for organising and coordinating practices for teacher training master’s programmes and single cycle long teacher training programmes. The regulations laid out in Sections 197-198 and Sections 200-201 shall be applied to the practical aspects of the teacher training master’s programme.

### Academic assessment

ANHE Section 49 (1) (1) During the period of education in the higher education institution, the fulfilment of academic requirements related to specific modules and syllabus units shall be expressed in points (hereinafter credit) and by awarding grades. The number of credits obtained shall express the progress made by the student during their studies, whilst the grades shall express quality.

ANHE Section 108 (48) Examination means a form of assessment to verify and evaluate the acquisition of knowledge, skills and abilities.

Vhr2. Section 7 (4) Assessment of student performance can be carried out according to:
a) a five-grade scale: excellent (5), good (4), satisfactory (3), pass (2), fail (1),
b) a three-grade scale: excellent (5), satisfactory (3), fail (1),

Vhr2. Section 8 (2) The value of the credit is not affected by the rating of the student’s knowledge, provided that the student’s performance has been accepted by the lecturer.

Vhr2. Section 9 (3) In the event the student has not attended the examination, his/her knowledge cannot be assessed.

Vhr2. Section 10 (1) Upon commencement of the study period, the higher education institution shall be required to publish in the Academic Guide, in the manner customary (…) the schedule of the examination period, in particular the first and the last day thereof. (…)

(2) The higher education institution shall determine in its academic and examination regulations:
a) (…) the terms and their schedules, the rules pertaining to fulfilling academic requirements, and the manner of testing and assessing knowledge,
b) the rules regarding registration for, organisation and administration of examinations (…)

### Section 64

(1) A study unit can be completed
a) by completing a course or exam course
b) by accepting earned credits.

(2) A course or exam course is completed if the student achieves a grade, on a five-grade scale or a three-grade scale, other than fail. Exam courses specified under Section 16 (3) b) can only complete courses, if the student has already taken the course.

(3) The student didn’t complete the course,
a) if the student achieved a failing grade,
b) if due to not completing a weak prerequisite in the same semester, the completion of a study unit with the prerequisite will be invalidated,
c) if the student omits a course, that is the student did not attempt to complete the course despite having registered for it: in case of seminars or practices the student did not participate in the classes, or for other reasons his/her performance can not be evaluated, in case of exams, the student did not attempt to pass the exam.

---

201 Established by Senate Rule CXX/2015. (29 June) Effective date: 15 August 2015.
(4) it cannot be considered course omission, if the course does not start or the student did not attempt to complete it because he/she has not completed the prerequisite study unit.

Section 65

(1) The lecturer shall enter the grade (evaluation) of the course or the exam course into the Electronic Registration System, print out the exam sheet, sign it and submit it to the Faculty Office of Educational Affairs.

(2) In the case of oral exams, in addition to provisions under (1), the lecturer records the grade on the sheet for validating oral exams (henceforth: validating sheet), printed out from Neptun, written out in numbers and letters, his/her signature and the date to validate it. The lecturer is only required to do this if student presents a validating sheet at the exam.

(3) The lecturer of the organisational unit responsible for the course publishes the grade, at the latest on the next working day after the evaluation is completed – in the case of independent evaluation, for example school practice, after receiving the evaluation report – it is to be recorded on Neptun.

(4) Messages sent via Neptun and the validating sheet serve as notifications of grades achieved by passing verbal exams, regarding grades achieved by other form of academic assessment Neptun messages serve as notifications.

(5) In the case of the grade recorded on Neptun and the grade achieved with an exam do not match, or despite the student having sat for an exam, a grade does not appear on Neptun, the student and/or the lecturer can lodge a complaint within 14 days following the examination period. In the case of missing this deadline, a complaint can only be lodged if for at least half the 14-day period available to lodge the complaint, the student was not able to act due to health problems that he/she can prove with a doctor’s note. The doctor’s note can be submitted within 3 days after the problem causing the absence is resolved. The evaluation process for the complaint is prepared by the Office for Educational Affairs, and if deemed justified, it will act accordingly within its scope of authority. If it is deemed unjustified, it will forward it to faculty Educational Committee for a first instance decision.

SEMINAR, PRACTICE, PRACTICAL GRADE

Section 66

(1) If the student has not received an excuse note specified under Section 63 (5), and the lecturer monitors attendance, due to the student’s absence

a) the lecturer cannot withhold a practical grade from the student, if the student was absent from a quarter of the classes at the most;

b) if the student is absent from between a quarter or third of the classes, the lecturer is entitled to give extra assignments to the student or withhold giving a practical grade, however, the lecturer must let the students know in the first class which option he/she chooses;

c) if the student is absent from a third of the classes, the student cannot be awarded a practical grade.

203 Established by Sen. Decision CLXXXII/2013. (27. V.). In force: 1. IX. 2013. with the specification that this regulation is applied to students acquiring a pre-degree certificate in the 2013/2014 academic year or after.

204 Established by Senate Rule CXX/2015. (29 June) Effective date: 15 August 2015.

205 Established by Senate Rule CXX/2015. (29 June) Effective date: 15 August 2015.

206 Established by Senate Rule CXX/2015. (29 June) Effective date: 15 August 2015.

207 Established by Senate Rule CXX/2015. (29 June) Effective date: 15 August 2015.

(2) The limit for tolerable absence from laboratory practice is set by the Head of the organisational unit responsible for the study unit. Students will be informed of this in the first class.

(3) 209

(4) 210 The practical grade must be awarded until the end of the first week in the examination period. Exemptions from this provision include field practice, school practice and practice at public education institutions.

(5) 211 Requirements of the practical grade – with the exception of field practice, professional training, school practice and practice at public education institutions – must be completed during the study period, however, at the request of the students after having consulted with the lecturer, the Head of the organisational unit responsible for the course may allow for extra assignments (e.g. retakes for in-class tests) that students perform before the end of the study period but not later than during the first week in the examination period, in order to achieve a grade. In this case, the deadline under paragraph (4) must be extended by a week.

(6) 212 Students must be given an opportunity to improve a failing practical grade – if the programme’s (including higher education vocational training) curriculum permits, or the course listing should have a relevant specification – in the first two weeks of the examination period. This must be entered into the course listing.

(7) If at least 67% of all students did not achieve a pass grade on an in-class test (not including re-takes), at the request of the student union, the organisational unit responsible for the course must launch an investigation.

(8) 213 Courses completed by awarding practical grade – excluding remedial criterion courses – cannot be completed by taking an exam course.

EXAMS AND COMPREHENSIVE EXAMS

SECTION 67

(1) Exams can be
a) oral exam;
b) written exam;
c) type “A” combined exam: the exam consists of a written and an oral component, the final result will be the average of the two, as stipulated in the training programme, a pass grade requires passing both parts;
d) type “B” combined exam: the exam consists of a written and oral component, sitting for the oral exam requires having passed the written exam, the final result is the oral exam’s grade, a fail grade in the written component however, concludes a fail grade altogether;
e) continuous assessment (type “C”): students sit for 3-4 in-class tests or submit coursework essays during the semester, thus giving evidence of their knowledge, the lecturer awards a grade based on these;
f) 214 type “D” combined exam: based on the result of an in-class test at the end of the study period, the lecturer offers the student a preliminary grade, which will be published at latest by the last day of the first week in the exam period. If the student does not accept the grade offered (or the lecturer has not offered a grade based on the result of the in-class test), the student sits for a oral or written exam during the exam period.

---

(2) 215The type of the exam must be indicated in the training programme and the course listing (complete with the exam requirements in the case of the latter), and lecturer must inform the students in the first class with any clarifications that may be required. The type of the remedial exams (for a fail grade, or a grade the student wishes to improve on) – except for foundation exams and comprehensive exams – may differ from the original exam’s type, which students should be notified of, together with the type of the retake or remedial exam. The type of regular exams can only be modified for the benefit of special needs students.

(3) In the case of type “A” combined exam, the course organiser, with the consent of the student can exempt the student from sitting the oral exam based on the written exam’s results, and take the grade of the written component as the final result for combined examination.

(4) In the case of type “B” exams, the written component precedes the oral component. In case of the written exam being a fail, the student cannot sit for the verbal exam. The failed written exam can be resat once. If the oral exam is a fail, this component needs to be retaken.

(5) The written component of combined exams, by the decision of the lecturer, can be completed by an in-class test during the study period or course work. If the combined exam’s written component is completed by in-class test during the study period, a maximum four of these tests can be sat for and the test dates must be discussed with the students in the first class.

(6) Students can sit for in-class tests during the time of the seminars or lectures. On the request or with the consent of the students other dates can be negotiated.

(7) Both component of combined exams must be completed during the same semester.

(8) 216 Results of the written component of type “A”, “B” and “D” combined exams, completed in study period, must be published within two weeks of sitting for them. The results of written components completed during the exam period must be published at latest by noon on the day before the oral exam, and recorded on Neptun.

(9) Results of an exams, comprising a written component as well, completed during the exam period must be published within 8 days.

Section 68

(1) A comprehensive exam (foundation exam in legal studies) is an exam verifying the extensive knowledge acquired in the relevant professional fields, rewarded with one grade, published as an exam courseand graded on a 5-grade scale.

(2) Comprehensive exams are exclusively oral exams, or type “A” or “B” combined exams. oral comprehensive exams – except at the Faculty of Law – must be held on one day. In the case of combined exams the written and oral components must be conducted in the same exam period.

(3) 217 Comprehensive exam requirements will be published when the given course is first announced and cannot be modified in the education period already in session.

(4) The oral component of a comprehensive exam is conducted in the presence of a two-member committee. Unless otherwise specified by the Dean, at least one committee member must be a university/college lecturer.

(5) If the committee has two members and one member is temporarily absent, the exam must be suspended. If a comprehensive exam committee member is absent, a comprehensive exam cannot proceed.

(6) The type of retake exams for comprehensive exams is specified in the training programme.
Section 69

(1) When publishing the results of written exams and the written component of comprehensive exams, the laws governing the protection of personal information must be carefully followed. Without the prior consent of the students, exam results matched with either names, or Neptun codes cannot be divulged in public.

(2) Students must be allowed an opportunity to inspect their graded written exams and the written component of comprehensive exams within one week of publishing the results.

(3) Having inspected the exam, the student can request the re-grading of the exam based on the answer sheet containing the correct answer or model answers and relevant literature from the grading.

Vhr2. Section 9 (1) Examinations shall be organised so that each student concerned can enrol for, and take, the examination. (…)

Vhr2. Section 10 (1) (…) The higher education institution shall publish in the manner customary, no later than three weeks before the end of the study period the dates set for the individual examinations, the name of the examiners, the date and manner of registration for the examinations, the date of publishing examination results, and the possibilities for retake examinations.

RULES REGULATING THE ORGANISATION OF EXAMINATIONS

SECTION 70

(1) A maximum number of participants must be set for each examination opportunity which must be recorded together with exam dates by the course organiser on Neptun. At the same time, the exam topics and syllabus must be published. Only such literature can be included as an exam requirement that, at the latest, at the time of publishing the exam dates, has been available in print or is accessible in an electronic format.

(2) The date of written exams is set by the course organiser, the date of the written component of comprehensive exams is set by the person professionally responsible for the programme, taking into account the opinion of the faculty Student Union. Written exams in the exam period must be scheduled with three dates, each, at least two weeks apart. The exam dates must be published by the end of the third week before the exam period.

(3) Oral exams can only be scheduled for the exam period.

(4) The dates of Oral exams are set by the course organiser and published by the end of the third week before the exam period. The number of exam dates (not including retakes) and the maximum number of students participating must be set so that it amounts to 120% of the number of students taking the course. An equal number of exam dates must be set for the 1st, 2nd, 3rd and 4th, 5th, 6th week of the exam period. With the consent of the Student Union this schedule can be deviated from. If the course organiser sets only two exam dates, they must be at least two weeks apart. This cannot be deviated from, not even with the consent of the students.

(5) Disputes between the students and the course organiser relating to the exam dates are settled with the help of the Head of the organisational unit responsible for the programme (including higher education vocational training), whose decision is binding to both the students and the course organiser.

(6) The organisational unit responsible or the lecturer can set the exact time for the exam for a group of students or individuals. Unless an exact time is specified, the exam starts for all students at 9 am, registered for the day. In the event of the lecturer’s absence, the Head of the

responsible organisational unit sees to the rescheduling of the exam, which cannot effect the students negatively.

(7) The Head of the relevant department is responsible for holding scheduled exams and rescheduling exams cancelled due to absence of the lecturer, in the case of committee exams the person responsible is the Head of the organisational unit responsible for the course.

(8) If on written exams (not including retakes or grade improving retakes), on comprehensive or foundation exams on a given exam date, at least 67% of students achieved a failing grade, and at the request of the Student Union, the organisational unit responsible for the programme (including higher education vocational training) must launch an inquiry.

(9) Exams retrospectively declared invalid are not included in the number of exams specified under Section 52 (1) of the present regulations.

Section 71

(1) Registering for an exam is the prerequisite of sitting for it. Students who registered for the relevant course can register for the exam.

(2) Students can register no more than three times for an exam of the same course (not including postponing exams) in the same exam period.

(3) The course organiser can preliminarily designate some exam dates as retakes or grade improving retakes.

(4) Only students who are instructed to sit for a retake or wish to improve the grade received can register for exams preliminarily designated as retakes or grade improving retakes.

(5) The student can register for an exam at the latest, 24 hours before the exam starts, which applies to exam cancellations and signing up for another date (postponing exams) that has the capacity, as well.

(6) It is not compulsory to provide students other exam dates who have postponed, however, in the case of postponing an exam with a justifiable excuse up until the end of the second-to-last week of the exam period, the student must be provided with the opportunity to take the exam.

(7) If the student is absent from an exam without a justifiable excuse and has not postponed, the exam is regarded unsuccessful and is included in the number of exam registrations for the semester, but is not included in the number of possible attempts to achieve a grade. An absence is only justifiable if it occurs due to reasons beyond the student’s control or attributed to external circumstances. A justified absence is seen as postponing the exam.

Section 72

(1) The lecturer checks the identity of students at the exam.

(2) The exam begins when the exam question is posed (a syllabus item is yielded to the student to be expounded upon). The student’s performance after this point must be rewarded with a grade.

(3) The lecturer may interrupt the exam and give the student a fail grade, if the lecturer discovers that the student has used unauthorised aid material, or the help of another student.

226 Established by Senate Rule CXX/2015. (29 June) Effective date: 15 August 2015.
227 First sentence established by Sen. Decision LIII/2010 (III. 29.). In force: 30. III. 2010 with the provision that it shall be in force from 1/IX/2010.
228 Enacted by Sen. Decision CLXXXII/2013. (V. 27.). In force: 1. IX. 2013 with the provision that it shall be applied to students gaining a pre-degree certificate in or after the academic year of 2013/2014.
(4) At oral exams, students must be given the opportunity to adequately prepare for the examination. Only at the student’s request may the preparation be dispensed with.
(5) Exams are conducted in the University’s premises, however, with the Dean’s permission exams may be held outside the University’s premises.
(6) Oral exams are publicly accessible to the students and the lectures of the University, taking into consideration the confinements of the place of the examination. Access can be restricted at the behest of the student.
(7) In the case of committee exams, the student’s evaluation is carried out by the Head of the committee, considering the opinion of the other committee members.

**ANHE Section 49 (4) (…) The higher education institution shall ensure that each student is tested and that both successful and unsuccessful examinations may be repeated by ensuring that the repeated exam is arranged and evaluated in an unbiased manner.**

**Vhr2. Section 9 (1) (…) The higher education institution shall allow the student to retake a previously unsuccessfully taken examination (hereinafter ‘remedial exam’) during the same term.**

(2) In case the student fails the remedial exam, and has been tested by the same examiner both on the examination and the retake examination, the student can request to sit the repeated retake examination before another lecturer or another examination board.

**RETAKE AND REMEDIAL EXAMS**

**SECTION 73**

(1) The course organiser – taking into consideration paragraph (5) of this Section – must provide an opportunity for students who failed their exam, by the end of the last week before the end of the exam period, to retake the exam, taking into consideration the number of these students. Retake dates must be provided in a manner pursuant to Specific Provisions.

(2) 229

(3) 230 If the conditions under Section 9 (2) of Vhr2. are present, the students can request in writing to take their exam in front of a committee from the Head of the organisational unit responsible for the course, at the latest by the date of the exam or within 7 seven working days from the publication of the exam results. The Head of the organisational unit must grant this opportunity if requested.

(4) The date of the exam specified under paragraph (3) is set by the committee. The student must be informed about the date of the exam within 3 working days (but not later than the fourth working day before the exam) in a notice by the Head of the organisational responsible for the course.

(5) Retakes or grade improving retakes (including retakes of the separate components of comprehensive exams) may take place three days after the date of the retaken exam, and five days after the date of the retaken exam in the case of comprehensive exams. At the request of a student, who gives a justifiable reason for the request, the Head of the organisational unit responsible for the course may set different dates.

(6) Retakes and grade improving retakes can only take place in the same semester.

(7) Retaking an unsuccessful Language Proficiency Exam may be banned by the training programme. This must be indicated with the following discretion: “cannot be retaken in the same semester”.

---

The student must be provided the opportunity to improve the grade of one exam per semester (including higher education vocational training) by retaking it. Retaking the exam renders the result of the previous one null and void.

Fees for retakes and unsuccessful exams and procedure pertaining to these matters are regulated by Chapters VI—VII of this Regulations.

**UNIQUELY TAILORED STUDY ARRANGEMENT**

**SECTION 74**

At the request of the student, the Faculty Educational Committee, considering the opinion of the Head of the organisational unit responsible for the programme (including higher education vocational training) may grant students permission to continue their studies in a uniquely tailored study arrangement.

Reasons for granting a uniquely tailored study arrangement may include:

d) being awarded a scholarship abroad;

Requesting a uniquely tailored study arrangement is possible on the basis of paragraph (2) a—c), if 50 credits are completed, and two successfully completed semesters with the exception of study circle members, who can request a uniquely tailored study arrangement, independent of the criteria above, after having gained a study circle membership.

The request for the uniquely tailored study arrangement must include the student’s plan of the study schedule and the special permission the student requests, furthermore, the request verifying documents must be attached.

The performance of a student studying in a uniquely tailored study arrangement is overseen by a lecturer, whose preliminary support for such an arrangement must be attached to the request.

The student studying in a uniquely tailored study arrangement is entitled to the following special permission:

a) permission to be absent from all or some classes;

b) permission to take exams outside the exam period;

c) permission to complete the requirements of the training programme in a different time frame or with different specifics.

As a result of a single request procedure, a uniquely tailored study arrangement can be permitted for no more than two semesters.

If the student completes less than 50% of credits registered for the semester, the permission for a uniquely tailored study arrangement can be revoked with consent of the overseeing lecturer.

In the case of an MA programme in education, the tuition fee is determined by the Teacher Training and Teacher Development Council, whereas for the single-cycle long programme in education the tuition fee is determined by the Conciliation Board of the Teacher Training Center.

(2) The tuition fees payable during the first year in the full tuition course category shall be published in the Guide for Admission to Higher Education. The amount of tuition fees to be paid by students of higher classes shall be published until 31 May of the previous academic year. REALLOCATION

Section 131/A.

The Student is reallocated or may be reallocated

b) by taking into account the number of state-financed semesters provided by law (132/B. §);

c) upon the request of the Student (132/C. §) by the University.

PERFORMANCE-BASED REALLOCATION

Ntfv. Section 48(1): The student shall be classified in the full or partially state financed or full tuition course category.

(2) Every semester, the higher education institution shall reallocate state-financed students who have failed to pass at least fifty percent of the credits specified in the

recommended syllabus, or the grade average recommended in the institution’s organisational and operational regulations in the last two semesters during which the student’s status was not suspended, or the students who have withdrawn their statements specified in 48/D.(2) into the full tuition category.

Decree Section 29(1) The decision concerning the reallocation between the state-financed or fee-paying, and the (partially) state-funded and full tuition category shall be made at the end of the academic year after the end of the study period, but at the latest 30 days before the beginning of the next study period.

(2) The students who pursued their studies in the given higher education institution for only one semester, or who – in accordance with the provision of Section 47(6) of the Nftv. – were not able to complete the semester due to illness, child-birth or other circumstances outside their control shall not be taken into consideration during the reallocation process.

Vhr1. Section 24(3): For a given semester, the quantitative and qualitative assessment of the student’s academic performance shall be based on the credit index and the corrected credit index. The credit index is calculated as follows: the credit value of the subjects completed during the term multiplied by the grades and divided by thirty, which is the average number of credits accrued by a student in one term. The corrected credit index can be calculated with a multiplicator corresponding to the ratio of credits taken and accrued by the student in his/her uniquely tailored study arrangement. The totalised corrected credit index serves to assess the quality and quantity of the performance of the student over several semesters. The totalised corrected credit index is calculated in the same way as the corrected credit index: thirty credits per semester and all the credits accrued during the whole period must be taken into consideration.

Section 132

(1) ^303^ The performance-based reallocation shall be concluded with regard to two student groups in a parallel proceeding:

a) the reallocation from the state-financed to the tuition-paying course category pertains to those students whose student status was established between 2007 and 1 August, 2012. The scope of this section does not extend to those students who pursued their studies at the University (including higher education vocational studies as well) in 2007, but who did not commence them at the University.

b) the reallocation from the (partially) state-funded to the full tuition course category pertains to those students whose student status was established in September 2012 – and after that date in a phasing-out system – or who commence their studies in a new programme (including higher education vocational training) in September 2012 or after that date. The scope of this section does not extend to those students who pursued their studies at the University (including higher education vocational studies as well) in 2012, but who did not commence them at the University.

(2) ^304^ For the reallocation process specified in this section, pursuant to the provisions of the Regulations, separate student groups shall be established in the Bachelor’s, single-cycle long and Master’s programmes for each branch of training and for each major.

(3) ^305^ The reallocation specified in the present section shall be carried out by the Academic Board until 31 July preceding the next academic year. The reallocation within

each group shall be based on the totalised corrected credit index and data concerning the academic performance of the students stored in the Electronic Registration System. The data necessary for the reallocation and the information concerning the right to equity shall be uploaded to the Electronic Registration System by the faculties until the 8th working day following the end of the exam period. The reconciliation and correction of the data stored in the Electronic Registration System shall be completed by the end of the third working day preceding 31 July.

(4) The scope of this section concerning the reallocation shall extend to students enrolled in fully or partially state-funded programmes and who did not collect at least 27 credits by completing courses or exam courses during their last two active semesters.

(5) The Student shall be notified electronically of the decision concerning the reallocation in accordance with paragraph (3) section 151 of the Regulation.

(6) The Academic Board shall ensure that decisions are made in a timely manner and that students are notified of that decision. The Heads of the faculties are responsible for the complete and authentic data concerning the academic performance of the students.

(7) The Student who has completed at least a certain period of the two semesters serving as basis for the reallocation within the framework of the Erasmus student exchange programme, or who has been granted uniquely tailored study arrangement shall be granted exemption from the reallocation process.

(8) If an illness, child-birth or other unexpected event hinders the Student in his/her studies (especially if the Student is not able to take the sufficient number of credits during the two active semesters serving as basis of the reallocation), the Board of Studies of the Faculty may grant the Student concerned, exemption from the reallocation upon his/her request. The request concerning such an exemption shall be submitted to the Board of Studies of the Faculty until 15 May. In the case of extraordinary circumstances arising after 1 May, the request shall be submitted to the Board of Studies of the Faculty at the latest on the last day of the exam period, along with the papers documenting/justifying the unexpected event. No excuse request may be submitted after the expiration of the relevant deadlines.

(9) The credits earned during the summer professional internship or field practice shall be counted with the credits collected in the next semester.

Ntfv. Section 48 (3) If the status of the (partial) Hungarian state scholarship supported Student accepted to the institution terminates before completing the programme, or the Student, for any reason, continues his/her studies by paying full tuition, the place of this student may – if the relevant request has been submitted – be replaced by a student paying the full tuition fee. The higher education institution shall make its decision concerning the request submitted by a tuition-paying student to be reallocated to the state-funded course category based on the students' performance.

Decree Section 29(5): The vacant state-funded places may be filled by:
a) students who have obtained at least 50% of the credits prescribed in the recommended curriculum during the last two active semesters and who appear on the
top of the student list made on the basis of the totalised corrected credit index, furthermore whose

b) totalised corrected credit index is higher than the corrected credit index of the student appearing in the bottom fifth on the totalised corrected credit index list of state-funded students.

(6) To determine the number of students who may be reallocated to the state-financed course category for the next study period, the higher education institution shall determine the following on the basis of the students’ academic performance:

a) the number of state-funded students whose student status was terminated in the given semester,

b) the number of state-funded students on the list who have been reallocated to the tuition-paying course category,

c) the number of students who, with the closed semester, have exhausted the number of state-funded semesters available in the given programme specified in Section 47(3) of the Nftv.

(7) The tuition-paying students who have previously used two more - in the case of disabled students, four more - state-financed semesters than the whole training period of the given programme cannot be reallocated to the state-funded course category.

(8) The students who were not reallocated will continue their studies in the same course (financing) category in the next academic year that they were in the preceding year.

Section 132/A.

(1) State-funded places that became vacant after the reallocation process may be filled by tuition-paying students in accordance with the provisions of Section 29 of the Decree.

(2) Pursuant to Section 48(3) of the Nftv., the vacant state-funded places may be filled by those students who pursue their studies in the same programme and who perform the best, based on the aggregated corrected credit index. The students shall be reallocated based on the following rules, in the following order:

a) for the vacant state-funded positions partially state-funded and tuition-paying students,

b) for the vacant partially state-funded position, tuition-paying students may be accepted.

(3) The students concerned shall be notified of the decision in accordance with the provisions of paragraph (4) section 132 of the Regulations until the 30th day preceding the beginning of the academic year.

(4) The provisions of Section 132 of the Regulations shall be applied to the uploading of the data concerning the academic performance of students paying full tuition.

(5) The Student can only be reallocated to a (partially) state-funded category if the he/she has submitted the relevant statement in the Electronic Registration System by the end of the exam-period.

(2) For the case specified in paragraph (1), the first day of the deadline for the payment of the tuition fee shall be the first day after the decision enters into force.

(3) If after the reallocation decision a scholarship/grant is awarded and fully or partially paid for the tuition-paying semester to the Student to which tuition-paying students are not eligible, paragraph (1) shall regulate the withdrawal of the scholarship and the reimbursement of the amount of the scholarship already paid.

**The Rules of Verification in the Appeal Proceedings**

Act CCIV of 2011 on National Higher Education (Hungarian abbreviation: ‘Nftv’) 57. § (6) With regards to verification, (...) it is the provisions of Act CXL of 2004 on the general rules of administrative proceedings and services (Hungarian abbreviation: Ket.) that shall be properly applied.
Act CXL of 2004 on the general rules of administrative proceedings and services (Ket.) 66. § (1) In the event that someone missed a set day or deadline without any fault on their part, they may present an excuse request.

(2) It is the authority during whose procedures the nonfeasance happened that makes a decision regarding the excuse request. In the event that the deadline of making an appeal was not met and the person in question presents an excuse request, it is the authority making the first-instance decision, or in cases where the deadline of initiating legal action was not met, the court handling administrative matters that assesses the request.

(3) In the event that the authority complied with the rules of notifying clients and disclosing decisions, an excuse request based on the fact that the notification and the communication about the decision did not happen through post may not be accepted. This provision is also decisive in the case of requests initiating a judicial review.

(4) The excuse request may be presented within 8 days after becoming aware of the nonfeasance or the ceasing of the obstacle, but 6 days at most counted from the day of expiry or the last day of the missed deadline.

(5) In the case of missing the deadline, as long as the conditions subsist, the missed action must be done along with presenting the excuse request.

Act CXL of 2004 on the general rules of administrative proceedings and services (Ket.) 67. § (1) If the authority grants the excuse request, the person submitting it shall be put in such procedural position as if the nonfeasance had not happened. To facilitate this, the authority amends or withdraws its decision, continues the proceedings in case the decision halting the proceedings was withdrawn, and repeats certain procedural actions. The restrictions specified in § 114 are not decisive in the case of amending or withdrawing the decision on the basis of the excuse request.

Section 203

(1) The teacher training thesis has two structural forms:
   a) an integrated thesis within the framework of the thesis written for the student’s major pertaining to the field of expertise of the major; as a part of it or as a whole,
   b) a self-sufficing thesis independent of the thesis written for the major, as an independent solution for a professional educational–pedagogical task contains the professional study related to the teaching of the major and/or pedagogy within itself, proving the ability to synthesise the learning material and applying it in a creative fashion. The integrated thesis has to fulfil the requirements of the thesis to be written at the major as well.
(2) A work (portfolio) created during studies pursued in the field of psychology, pedagogy and methodology, based on independent tasks, class papers loosely related to each other may be accepted as an independent thesis. This has to contain at least 4 practical works evaluated by the teacher in charge of the practice, a review of the literature in close connection with these, and one chapter summarising the conclusions and providing evaluation.
(3) In the event of pursuing teacher training on multiple teaching majors or alongside majors that may be the basis of teacher training and concluding these simultaneously or within 3 academic years after each other, the teacher thesis shall be written in connection with only one of the majors. In this case, this means that only one of the teacher training’s qualifying examinations is about defending the thesis.
(4) Upon declaring the intention to write an integrated thesis, the major and PK OTF approve it together. The independent thesis is approved by PK OTF – upon seeking the opinion of the relevant faculty/faculties.
(5) The evaluation of the integrated thesis shall examine and discuss both the content relating to the major and the teacher training. If necessary, separate opponents may be requested for the different contents. The independent thesis shall be evaluated by one opponent.
(6) The Teacher Training and Teacher Vocational Training Council lays down suggestions and obligatory instructions in order to consolidate the content- and form-related requirements of the teacher training theses.

Section 204

(1) The student
   a) shall submit the independent teacher training thesis (including the portfolio) in one printed and spiral bound (or thermal bound, or with the use of other forms
of binding) copy, at the Office of Educational Affairs; electronically, at the PK OTF.

(2) The deadline for submitting the thesis
a) in the autumn semester: 20 November,
b) in the spring semester: 20 April.

Submitting the integrated teacher training thesis may take place later in the event that the deadline of the thesis to be written at the major is at a different time.

(3) Upon registering the thesis, the Office of Educational Affairs forwards it to the opponent for evaluation.

Section 205

(1) The opponent of the teacher training thesis is the consultant.

(2) The grade of the thesis is given by the opponent. The evaluation containing the assessment and the grade of the thesis shall be attached to the thesis.

(3) 412 In the event that the teacher training thesis is a failure, the PK OTF requests a new opponent. In this case, the grade of the thesis is the arithmetic mean of the two evaluations.

(4) The thesis and the evaluation shall be forwarded to the head of the final examination committee at least 2 weeks prior to the final exam.

(5) 413 The evaluation of the thesis may be received at the Office of Educational Affairs, one week prior to the qualifying exam.

Section 206

(1) 414 The qualifying exam is the final examination at the end of teacher training, which may be held within the framework of the final exam of the major, as a separate part of it, or independently. The independent qualifying exam (or exam part) is organised by PK OTF.

(2) 415 The student shall apply to the independently organised qualifying exam at PK OTF.

a) in the autumn semester: until 20 October,
b) in the spring semester: until 20 March.

Section 244

ACADEMIC SCHOLARSHIP

Section 245

(1) The academic scholarship is a tuition aid regularly paid to the student based on his/her academic achievement in the previous semester.

(2) Students eligible for an academic scholarship are those whose grade point average necessary for calculating the scholarship, is higher than the scholarship index of the student at the midpoint of scholarship index ranking for students whose education is state-funded.

(3) Academic scholarships are determined separately for each programme.

(4) Students who have transferred from another higher education institute shall have their averages calculated according to the faculty’s regulations for calculating the average, using the courses, credits and weights listed in the curriculum of the given programme, as well as the grades obtained by the student in the other higher education institute.

(5) The average can only be used as the basis for scholarship payment if the student has successfully obtained no less than 16 credits. The minimum credit requirement for students with Erasmus scholarships is 10 successfully obtained credits. In the case of Erasmus students, course grades taken into account when calculating the grade point average are the ones the student has successfully completed and which have been entered into the Electronic Registration System up to the day on which scholarships are calculated.

(6) The following formula is used to calculate the scholarship index:

\[ \frac{\sum (\text{credits obtained} \times \text{grade} \times \text{weight})}{\sum (\text{credits obtained} \times \text{weight})} \]

(7) Weight referred to in paragraph (5):
   a) 3: in the case of complex exams and language proficiency exams,
   b) 2: in the case of exams.
c) 1: in the case of all other grades.

(8) Only successfully completed courses part of the relevant programme are calculated into the scholarship index.

(9) When including courses not resulting in the obtainment of credits (courses ending with a language proficiency exam or a complex exam) in the scholarship index formula, the number of lessons for said courses is to be taken into account, and substituted into the formula.

(10) The method for calculating academic scholarships is the following:
   a) The number of students eligible for an academic scholarship shall be determined using Section 244 (2),
   b) The number of students determined in a) is to be multiplied by the minimum sum payable (5% of the student normative), as defined in legislation.
   c) The sum calculated on the basis of b) is to be deducted from the scholarship allocation,
   d) The faculty average for the relevant programme is to be deducted from average determined by the use of paragraphs (1), (2) and (4) of this section.
   e) The differences rounded to the nearest hundredth calculated in d) on the basis of a) are to be multiplied by 100, (this product is the multiplier to be applied to the relevant student)
   f) Following the calculation laid out in e), the products for all eligible students determined in a) are to be added up,
   g) Following the calculation laid out in (c), the scholarship allocation remaining after sums payable to all eligible students have been deducted, is to be divided by the sum resulting from the calculation laid out in f) (this quotient determines one unit of the scholarship),
   h) The unit calculated in g), rounded to the nearest whole, is to be multiplied by the multiplier for each student eligible for a grant in accordance with a). This result must then be added to the minimum sum payable defined in legislation [referred to in b)], to calculate the sum to be allocated to the grade point averages on the basis of which grants are paid,
   i) The grade point averages on the basis of which grants are paid, are to be allocated to the respective students.

(5) The request to include results from a college for advanced studies and results obtained from other faculties at ELTE, laid down in Section 98 (2), in the academic scholarship shall be submitted to the PK TO faculty desk by filling out the form referenced in the Annex to the Rules and Procedures of Student Affairs. (7) The basis for calculating the academic scholarship is determining sum per study unit ratio, which can be done with the help of the graph below.

![Graph showing the calculation of sum per study unit ratio](image)
Legend:

- n: the number of students who have passed the course
- a: the number of students who have passed the course with a 5 (excellent)
- b: the number of students who have passed the course with a 4 (good)
- c: the number of students who have passed the course with a 3 (average)
- d: the number of students who have passed the course with a 2 (satisfactory)

P: Sum per study unit

Calculated ratios:

\[
T_1 = \frac{a}{n} \left( 2 - \frac{a}{n} \right)
\]

\[
T_2 = \frac{b}{n} \left( 2 - \frac{b + 2a}{n} \right)
\]

\[
T_3 = \frac{c}{n} \left( 2 - \frac{c + 2a + 2b}{n} \right)
\]

\[
T_4 = \left( \frac{d}{n} \right)^2
\]

Scholarship sum per this study unit:

\[
O_1 = P \frac{T_1}{a}
\]

\[
O_2 = P \frac{T_2}{b}
\]

\[
O_3 = P \frac{T_3}{c}
\]

\[
O_4 = P \frac{T_4}{d}
\]

(8) The scholarship sum for all students regarding all study units is calculated using the above algorithm. Students receiving these scholarship sums are those whose grades for the relevant subject is greater than or equal to the average grade for the given subject. The scholarship funds allocated to students who obtain grades below the average grade for the given subject shall be divided among students obtaining grades greater than or equal to the average grade for the given subject. This division is done in the following way: the sum per a given exam of students obtaining grades greater than or equal to the average grade for a given subject divided by every sum of scholarship money allocated to students obtaining grades greater than or equal to the average grade for a given subject, multiplied by the scholarship funds allocated to students who obtain grades below the average grade for a given subject.

(9) The sum of scholarship money per study unit calculated in paragraph (8) determines the student’s monthly academic scholarship money.

(10) Should the monthly sum calculated in paragraph (9) fall below the sum determined by the Faculty Scholarship Board - in line with the minimum scholarship money defined in the relevant government decree - the student will not receive an academic scholarship.

(11) The remaining funds shall be distributed among students receiving academic scholarships, in proportion with the scholarships calculated in paragraph (9).
(12) The student receives scholarship money in accordance with the amount calculated in paragraph (11), rounded to the nearest HUF 100.

THE GRANT FOR STUDIES

Section 428

(1) Grant for studies can be granted for a semester for students in a state-funded or partly state-funded full-time training from the second registered semester.

(2) The amount of the grant for studies is counted based on the grades of the previous semester, with regard to the student’s studies on any of the faculties of the University, irrespective of their type. If the student has suspended his or her studies in the previous semester, the basis of the counting is the last semester completed with student status.

(3) Counting the grant for a student transferred from another higher education institution is based on the grades of the semester completed in the previous institution according to the same rules.

(4) The amount of the grant is determined by the office of the faculty with regard to the available allocations.

(5) If there is any remaining amount of money due to changes over the semester, it has to be added to the last payments of the grant divided in accordance with the proportion of the students’ grants. Remaining amounts which cannot be used as payments are added to the amount of the social grant.

Section 429

(1) Grant for studies cannot be granted for a student who in the previous semester performed less than:

   a) 15 credits in higher education training and in multi-cycle Bachelor or Master’s Degree courses,
   b) 6 study units in the case of a higher education training completed in non-credit system.

(2) The amount of the unified grant for studies is divided according to the one decimal digit of the grant index, of the students in a sum of HUF 100. Counting is done by the Office of Educational Affairs. The final distribution is approved by the Chair of the Student’s Welfare Committee of the Student’s Union. In the case of individual complaints in connection with the grant the Dean has the jurisdiction to act.

(3) Whoever is eligible for a grant laid down in a government regulation is determined based on the ranking of the grant index. Ranking varies

   a) between students attending a Bachelor or a Master's Training Programme: per degree courses, in this case the degree course completed in a state-funded or partly state-funded degree course should be counted, in the case of several of these courses, the one in which the student was enrolled firstly irrespective of the form of financing,
   b) students attending degree courses of the previous credit system and non-credit system: in unified ranking.

(4) The method of counting the index of the grant:

   a) In the case of a higher education training and in multi-cycle Bachelor or Master’s Degree courses:

   \[ i_k = \left( \frac{\sum \text{(grade} \times \text{credits of the study unit)}}{\text{credits completed during the semester}} \right) \times \text{credit factor} \]

Baseline for the credit factor is 1. If the student completed more than 15 credits, the completed credits above 15 are multiplied by 0.025 which is added to the baseline for the credit factor.

b) in the case of students of higher education training completed in a non-credit system:

\[
\hat{\text{ink}} = \frac{\sum \text{grade}}{\text{study units completed during the semester}} \times 0.05 \text{index of the study unit}
\]

The baseline of the study unit index is 1. If the student completed more than 6 study units, the completed study units above 6 are multiplied by 0.05 which is added to the baseline for the study unit index.

(5) In the case of an improving or a re-take exam the last grade will be counted when determining the grade average.

(6) Every completed and registered study unit counting towards the student’s major is counted when determining the grant index.

(2) When applying Section 64(2) of the HKR “not completed” under (1) shall be interpreted as “fail”.

(3) Grades cannot be assigned to the assessments under (1). They cannot be quantified in the academic average.

Section 541\textsuperscript{716}

ad Section 65(6)

The right of first instance decision may be transferred to the Vice-Dean for Education by the Academic and Educational Committee.

Section 542

ad Section 66

(1) If the curriculum does not require a different assessment, the requirement for obtaining a practice grade (on the basis of the lecturer’s decision) is either taking 2 classroom tests or submitting an assignment.

(2) The requirements of a practice grade shall be (primarily) fulfilled in the study period. If completion is partially incomplete, based on the proposal of the practice instructor the Head of department may determine further tasks (repeat measurement, repeat test) to be completed after the end of the study period or in the first week of the examination period at the latest in order to obtain the practice grade.

(3) Attendance is mandatory in laboratory practices (or in other practices qualified as the same by the curriculum). Attendance shall be monitored regularly. If a student is absent from more than 1/4 of the contact hours, the practice grade shall be denied.

(4) Attendance is mandatory in field practices, internships, factory visits and in teaching practices. If a student is absent from these, making up for them is only possible by completing a practice the syllabus of which is determined by the organisational unit responsible for the degree.

(5)\textsuperscript{717} Except for the laboratory practice grade the requirement for obtaining a practice grade cannot be one, in addition to the requirements specified in Section 66(1) of the HKR, where attendance in contact hours is required to exceed 3/4 of the number of contact hours.

(7) A student may attempt to receive a passing grade in a failed practice once in a semester (retake exam in a practice). Depending on the nature of the practice the following options are available:

a) oral and/or written exam covering the course material;

b) an assignment regarding the course material.

\textsuperscript{715} Registered by the decision CCCVI/2010 (6 December) of the Senate on the amendment of the Chapter concerning the Faculty of Science of the Academic Regulations for Students’ Special Section of Volume 2 of the Organizational and Operational Regulations of ELTE. It is effective as of 27 May 2014.
The practice instructor has the right to choose from the above options. At the student’s request the decision of the practice instructor may be overruled by the Head of the institute.

8 If the measurements were not successful during a laboratory practice as a result of unacceptable laboratory performance, the student is not obliged to, but may be given the chance to improve. This shall be specified in the curriculum.

9 If the result of the field practice is not successful due to unacceptable performance during the processing, the requirements of this Section (7) shall apply. If the result continues to be unsuccessful, only the processing shall be repeated. The curriculum determines when the entire field practice shall be repeated.

10 If the student fails to complete an internship or receives an assessment for it that counts as a fail, the internship shall be repeated.

11 The catch-up criterion courses are assessed on a two-grade scale.

12 No-credit practices which are related to obligatory lectures are assessed by signatures. The requirements for obtaining a signature are determined by the Head of department and the lecturer. The students shall be informed about these in the first lesson or these shall be published. Where the curriculum requires, the related practice shall be repeated, if the lecture was not completed successfully.

1 In the study period knowledge may be continuously tested by classroom tests and homework assignments. The results of the tests may affect the end-term assessment positively (examination relief). The requirements of this are determined by the lecturer. Students shall be informed about this until the end of the study period’s week 2.

2 Groups of students or students in the same academic year shall primarily be tested during a practice or a lecture. If the test is held at a different time, the number of practices or lectures equalling the duration of the test shall not be held. In the latter case the date shall be set following a consultation with the students. This date shall not fall on a public holiday or a school holiday and in the case of a test taken by a group of students, it shall not fall to a Saturday. If the time is not suitable for at least 1/4 of the students concerned, a new date shall be set for them following a consultation with them.

3 Before classroom tests begin, the students shall be informed about the scores of each task.

4 The students shall be provided the opportunity to look at their corrected and graded classroom tests. The tests on the basis of which students receive a grade shall be retained at least until the beginning of the next examination period.

MEMBERS OF THE SCHOLARSHIP COMMITTEE OF THE FACULTY OF SCIENCE
Section 559

ad Section 99
The Scholarship Committee of the Faculty of Science has 6 members.

ACADEMIC SCHOLARSHIP
Section 560

ad Section 100
(1) Students eligible for an academic scholarship are those specified in Section 96 (2) of the present Regulations.
(2) Students transferred from other higher education institutions or from other programmes within the university are not eligible for an academic scholarship in first semester in which scholarships are disbursed.
(3) Students transferred within the Faculty are eligible for an academic scholarship as early as the first semester in which scholarships are disbursed.
(4) The academic scholarship is calculated by the Office of Education Affairs in accordance with paragraphs (11)-(14) of this Section, based on information registered in the Electronic Registration System.
(5) Scholarship payments shall be terminated by 5 March at the latest in the spring semester and by 5 October at the latest in the autumn semester based on information registered in the Electronic Registration System up to those dates.
(6) Total amount of credits completed: the number of credits obtained by students eligible for an academic scholarship in the last semester completed before the current semester (hereinafter: last semester).
(7) Sum per credit: the quotient of the scholarship fund available per month and the total amount of credits completed,
(8) Sum per study unit: the product of the number of students eligible for academic scholarship who have taken up and completed a given study unit at the Faculty, the number of credits obtained for completion of the study unit and the sum per credit.
(9) The basis for calculating the academic scholarship is determining sum per study unit ratio, which can be done with the help of the graph below.

\[ \frac{2}{n} \]

\[ T_1, T_2 \]

\[ a, b+c, a+b+c+d \]
Legend:
n: the number of students who have passed the course
a: the number of students who have passed the course with a 5 (excellent)
b: the number of students who have passed the course with a 4 (good)
c: the number of students who have passed the course with a 3 (average)
d: the number of students who have passed the course with a 2 (satisfactory)
P: Sum per study unit

Calculated ratios:

\[ T_1 = \frac{a}{n} \left( 2 - \frac{a}{n} \right) \]
\[ T_2 = \frac{b}{n} \left( 2 - \frac{b + 2a}{n} \right) \]
\[ T_3 = \frac{c}{n} \left( 2 - \frac{c + 2a + 2b}{n} \right) \]
\[ T_4 = \left( \frac{d}{n} \right)^2 \]

Scholarship sum per this study unit:

\[ O_1 = P \frac{T_1}{a} \]
\[ O_2 = P \frac{T_2}{b} \]
\[ O_3 = P \frac{T_3}{c} \]
\[ O_4 = P \frac{T_4}{d} \]

(10) The scholarship sum for all students regarding all study units is calculated using the above algorithm. The sum of the parts presented in paragraph (9) is equal to the student’s academic scholarship amount for a given semester. The sum divided by 5 is equal to the student’s scholarship amount for one month.

(11) Should the monthly sum calculated in paragraph (9) fall below the sum determined by the Faculty Scholarship Board, the student will not receive an academic scholarship.

(12) The remaining funds shall be distributed among students receiving academic scholarships, in proportion with the scholarships calculated in paragraph (9).
